Course Code	Course Title	Description	Academic Unit
MTD800	Professional Practice Inquiry Skills	This course aims to provide participants with the skills for data collection and analysis to support various aspects of the instructional design process, from training needs analysis to programme evaluation, to usability testing. Knowledge of quantitative and qualitative methods for data collection and analysis are needed to ensure quality data collection to support decision-making during the instructional design process. Participants will learn to design survey instruments, interview protocols and observation protocols, and analyze quantitative and qualitative data associated with common data collection methods required in the field. This course also prepares participants with the core skills to undertake the Professional Practice Project.	3
MTD900	Professional Practice Inquiry Skills	This course equips students with the methodological skills to conduct professional practice inquiry in the training, workplace learning and adult learning contexts. It also helps students to start preliminary work for their professional practice inquiry project. ● Design survey instruments, interview protocols, and observation protocols for an instructional design project. ● Analyze quantitative and qualitative data associated with common data collection methods required in the field of instructional design for an instructional design project. ● Draft an IRB application for an instructional design project.	2
MTD804	Facilitating Learning and Performance Improvements at Work	This course seeks to equip participants with the skills to critically examine the roles and purposes of various learning processes across different contexts such as workplace learning, professional learning communities and e-learning. Drawing from literature on different modes of learning, the course examines the performance-oriented approach that organizations typically adopt in developing their staff, enabling participants to appreciate the need for these organizations to expect a return of investment from these development initiatives as part of the constant drive to improve organizational effectiveness.	4
MTD904	Facilitating Learning and Performance Improvements at Work	Training professionals need to be equipped with the ability to critically examine the roles and purposes of various learning processes in workplace learning contexts. This will be useful in informing course participants on the performance-oriented approach that organizations take to learning and training activities to ensure good return of investment. * Analyse how the workplace, its practices and processes are developing individual capabilities and abilities needed for performance improvement; * Develop a proposal describing and justifying a suitable learning roadmap to facilitate performance improvement of individuals and their school/organisation; * Critically review the proposed learning roadmap and examine the appropriateness of various learning strategies and their effectiveness; and * Critically reflect on views and stance on facilitating learning and performance at the workplace.	4
MML909	Theories of Grammar	The course will provide an overview of theories of formal syntax, considered from the perspective of logic, linguistics, and philosophy of language. Through the course, participants will progressively build up a consistent grammar for a fragment of Malay language, beginning from Pelita Bahasa Melayu as conceptualized by Zaba, a traditional grammarian to the modern grammar of Malay language. Through the fundamental concepts in syntactic analysis such as part of speech types, constituent structure and the syntax-semantics interface, participants will understand the formulation of grammar as a formal system of rules and constraints and how contemporary theories can be applied in areas such as language teaching and learning.	4
MTL903	Tamil Language in Education	Check with AG	4
MAC817	Psychopathology and Appraisal	Psychopathology and Appraisal provides an overview of the Diagnostic and Statistical Manual of Mental Disorders 5th Edition (DSM-5) and equips students with the foundational knowledge relating to the etiology, identification, developmental course and treatments of various psychological disorders observed across the life-span (i.e., children and adults). The psychological disorders covered include, anxiety disorders, obsessive compulsive and related disorders, bipolar and related disorders, depressive disorders, personality disorders, somatic symptom and related disorders, dissociative disorders, schizophrenia spectrum and other psychotic disorders, feeding and eating disorders, and neurodevelopmental disorders.	3
